GO enrichment results
regulation of immune effector process
regulation of production of molecular mediator of immune response
leukocyte mediated immunity
regulation of leukocyte proliferation
cytokine production involved in immune response
mononuclear cell differentiation
production of molecular mediator of immune response
leukocyte proliferation
regulation of leukocyte differentiation
regulation of T cell activation
regulation of lymphocyte proliferation
adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains
viral entry into host cell
leukocyte cell−cell adhesion
leukocyte migration
positive regulation of natural killer cell mediated cytotoxicity
leukocyte activation involved in immune response
regulation of leukocyte mediated cytotoxicity
lymphocyte proliferation
negative regulation of immune response
