

# GO enrichment results

positive regulation of insulin-like growth factor receptor signaling pathway

type B pancreatic cell proliferation

regulation of insulin-like growth factor receptor signaling pathway

regulation of glucose metabolic process

negative regulation of canonical Wnt signaling pathway

regulation of cellular carbohydrate metabolic process

negative regulation of Wnt signaling pathway

regulation of carbohydrate metabolic process

glucose metabolic process

hexose metabolic process

regulation of canonical Wnt signaling pathway

monosaccharide metabolic process

cellular carbohydrate metabolic process

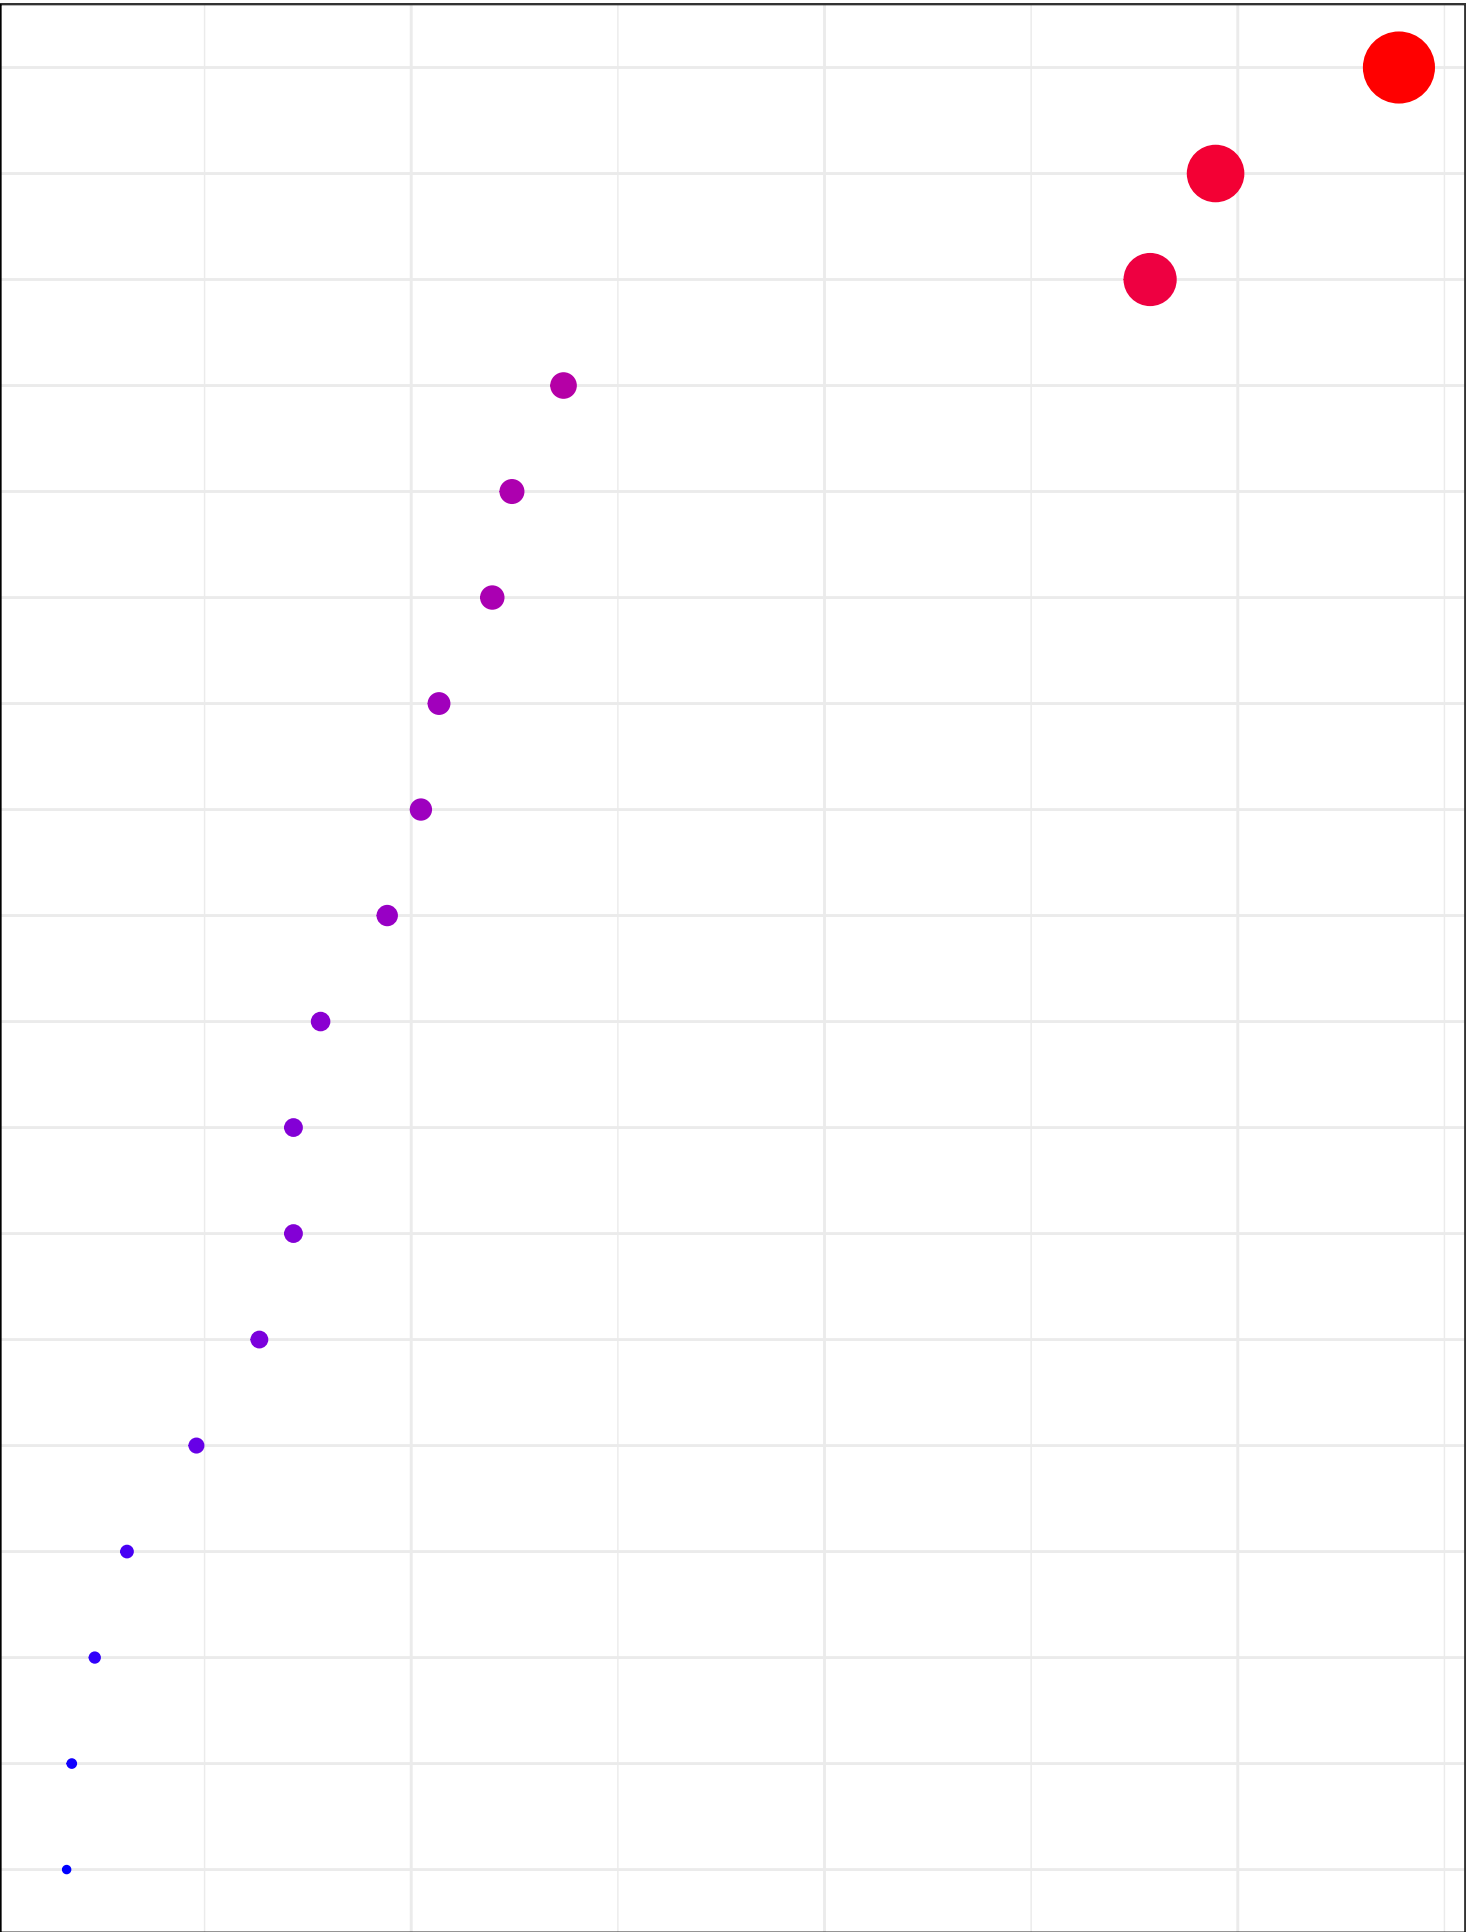

regulation of small molecule metabolic process

regulation of cell growth

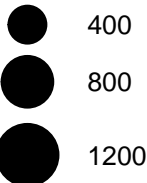

cell-cell signaling by wnt

cell growth

positive regulation of MAPK cascade
